### Released Shifts

Our mobile app features 'Released Shifts,' where consultants release shifts available to all users. The shift is claimed by the first user to accept it, ensuring efficient scheduling.

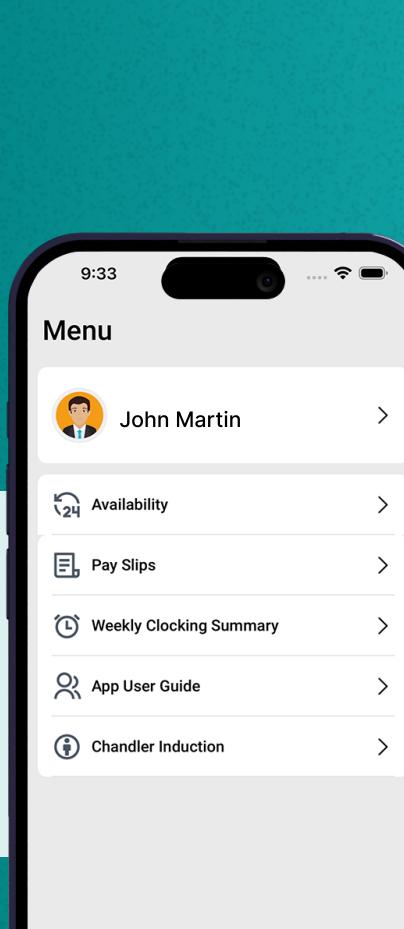

#### What is Released Shift?

A shift that has become available and gets released by our consultants for the first available person to pick it up. Users can swiftly claim these shifts on a first-come, first-served basis, optimizing scheduling flexibility and efficiency.

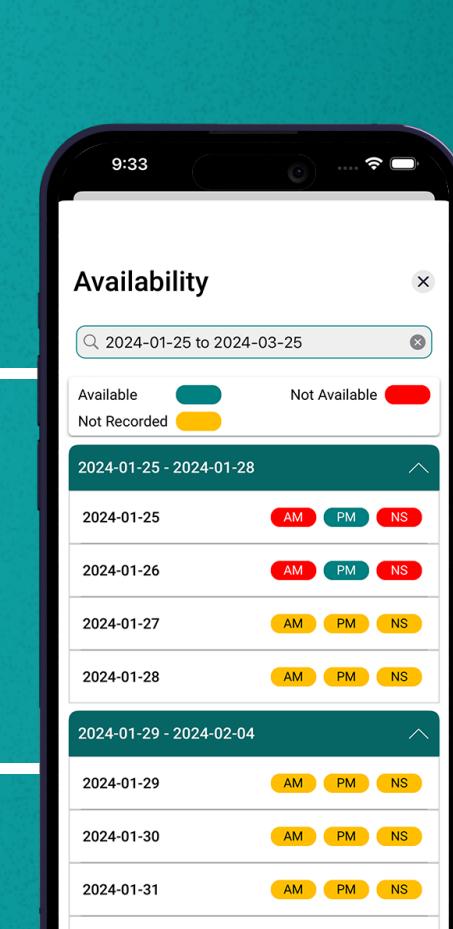

### Released Shift Acceptance

Accept released shifts seamlessly with the tap of a button on this screen, streamlining your scheduling process.

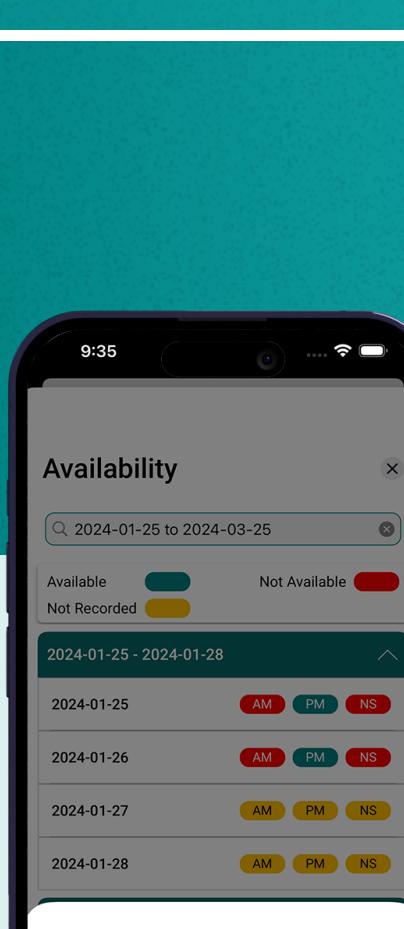

### Pending Approval

Easily track your accepted shifts awaiting consultant approval on this screen, accessible only to accepted users, ensuring clarity and accountability in the scheduling process.

### Pending Shifts

This screen displays shifts assigned to you by consultants, allowing you to conveniently review and accept pending assignments in one place, simplifying your workflow.

### Accept Shifts

This popup screen enables users to accept pending shifts while viewing directions to the work location beforehand, ensuring smooth transitions and informed decision-making.

### Confirmed Shifts

The 'Confirmed Shifts' screen conveniently lists all shifts accepted by the user, providing a comprehensive view of their weekly work schedule for easy planning and organization.

### Menu

Explore additional features in the menu, including access to payslips via PIN code for secure viewing, and a weekly clocking summary for convenient tracking of work hours and schedules.

### Availability

This screen displays the app user's availability for upcoming weeks, offering a detailed view of daily and weekly availability for AM, PM, and night shifts (NS). Users can also filter availability based on specific date ranges for efficient scheduling.

### Set Availability

Users can easily set their availability for each day by tapping on each day, which opens a popup screen to specify availability for AM, PM, and night shifts (NS), enabling efficient communication with consultants for future shift assignments.
